OBJECTIVE

Aspiring Java Full Stack Developer with a strong foundation in Java, web technologies, and problem-solving. Passionate about building scalable applications and continuously learning modern software development practices. Seeking an opportunity to contribute, learn, and grow in a dynamic organization.

TECHNICAL SKILLS

Programming Languages: Java, Python basics

Web Technologies: HTML, CSS, JavaScript

Database: MySQL

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA

Concepts: OOP, Data Structures & Algorithms

Soft Skills: Problem Solving, Teamwork, Communication, Adaptability

EDUCATION

B.E. Computer Science and Engineering

CGPA: 8.6

Annapoorana Engineering College — Final Year

Higher Secondary (12th)

61%

Swamy Vivekananda Matriculation Higher Secondary School

INTERNSHIP EXPERIENCE

Java Development Intern | CodSoft

June 2025 – July 2025

- Developed and enhanced Java-based applications, applying core OOP principles (encapsulation, inheritance, polymorphism) to build efficient, reusable code modules.
- Collaborated with team members on real-world programming tasks, strengthening proficiency in Java syntax, debugging, and logical problem-solving.
- Delivered assigned projects within deadlines, demonstrating strong self-learning ability and adherence to coding best practices.

Java Intern | Internship Studio

Jan 2026 – Feb 2026

- Gained hands-on experience with core Java concepts including classes, objects, inheritance, interfaces, and exception handling.
- Completed coding exercises and mini-projects to strengthen backend development fundamentals and application logic.
- Received mentorship on industry-standard coding practices, version control, and software development workflows.

ACADEMIC PROJECTS

Student Management System — Java, JDBC, MySQL

- Designed and developed a Student Management System using Java and JDBC to manage student records, attendance, and academic details.
- Implemented complete CRUD (Create, Read, Update, Delete) operations with a normalized MySQL relational database schema, ensuring efficient and accurate data handling.
- Applied Object-Oriented Programming principles to build modular, maintainable, and scalable code architecture.

Online Food Ordering System — Java Full Stack

- Built a full-stack Online Food Ordering System using Java for backend logic and HTML, CSS, and JavaScript for a responsive front end.
- Designed intuitive interfaces for menu browsing, cart management, and order placement, enhancing overall user experience.
- Integrated MySQL for backend data management and implemented core Java logic for order processing, ensuring seamless end-to-end functionality.

ACHIEVEMENTS

- First Prize – Paper Presentation on "Future Technologies."
- Team Leader – Successfully led academic team activities, coordinating members and ensuring timely completion of project and seminar deliverables.

CERTIFICATIONS

- Cisco – Introduction to Modern AI
- Deloitte Australia – Technology Virtual Experience Program (Forage)
- L&T EduTech – Full Stack Development
- Microsoft Power BI Data Analyst (Microsoft in association with ICT Academy)
- ChatGPT for Everything – HCL GUVI
- Web Application Development – George Academy
